

Frankston Concrete Products supplies precast concrete and associated products.

- The cement used is a Portland type that complies with AS3972.
- The aggregates used by FCP complies with AS2758.1.
- The concrete complies with AS1379 and exceeds the requirements of 15mpa as defined in AS3600, i.e. FCP use **40MPa concrete**.
- The chemical dose that is added to the concrete complies with AS1478.
- Steel reinforcement bars used in the concrete complies with AS1302.
- Each stormwater pit manufactured on our premises has been engineered to withstand a vertical load of 210kN and a lateral pressure of 25kpa.

We warrant all our precast concrete products against defective workmanship and faulty materials for a ten-year period from date of purchase and would undertake at our expense to repair free of charge any claims that may arise.

We warrant all our cast iron access covers and mild steel galvanized grates against defective workmanship and faulty materials for a ten-year period from date of purchase and would undertake at our expense to repair free of charge any claims that may arise.

All precast concrete products and associated products must be installed in accordance with all relevant authorities and must be lifted with the correct lifting equipment. The above warranty will be void if products are installed or lifted incorrectly.
